

Kologik Records Management System (RMS) New Features and Improvements

RMS 1.0.86 Release Notes
Release Date: May 26, 2022

NEW FEATURES

- As a property and evidence custodian, the ability to delete items has been added; this will allow the custodian to remove items that were entered incorrectly. This will require administrative rights to perform this action. Although an item has been deleted it is visible in the table with an option to restore.

ID	Status	Description
3	P	
4	P	
5	P	
6	E	RETRIEVED FROM SUSPECT.
7	P	
8	P	
9	P	
10	P	
11	P	
12	P	

Restoration Details:
By: ADMIN on 05/13/2022 10:38.
Reason: OPPS

Property & Evidence permissions:
PE_VIEW -> View property & evidence record (unable to create or edit records)
PE_ADMIN -> Create and edit property & evidence records.
PE_DELETE -> Delete and Restore property & evidence records.

- Any Incident Report can now have a Public Report version that mimics a full report including agency name and badge. It will also remove sensitive information from public release. ***These reports should still be verified.**

Arrest Register History

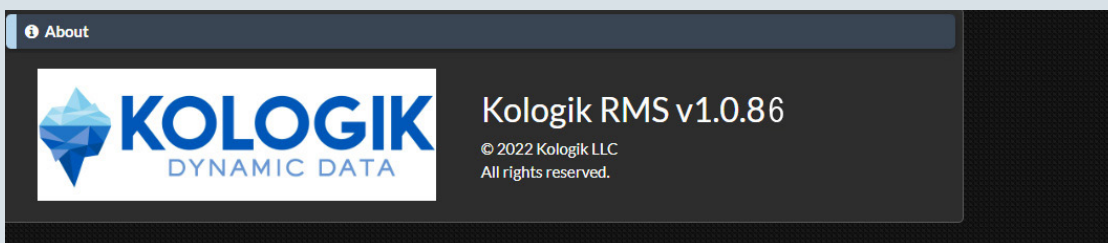

Case Number	Date	Person (name, sex, race, dob)
22-264	05/18/2022 18:56	MERHOFF TYLER WAYNE W M 05/03/2000

- A new hyperlink has been added to the Calls For Service page that will direct you to the incident page to see the incident details.
- A new DSN# field has been added to the Ticket Tracker module. This may be treated as a badge number and can change periodically.

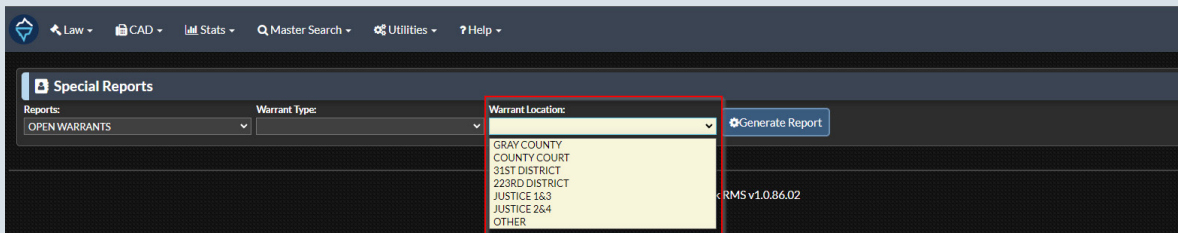

The screenshot shows a dark-themed interface with two input fields. The first field is labeled "DSN#" and contains the text "1506". The second field is labeled "Agency" and contains a dropdown menu with "SHERIFF" selected. A mouse cursor is pointing at the "Agency" label.

- An About page has been added to the RMS home page that displays the current software version.

IMPROVEMENTS

- In the Warrants section the "Warrant Location" was not displayed. Now you can find, under Special Reports, a drop-down that includes Warrant Location.

- When entering a ticket to the Ticket Tracker module the 'Issued By' does not fill out automatically in the 'Ticket Search' menu. The 'Issued By' is now automatically displayed in the search.

The screenshot shows the Ticket Tracker interface. At the top, there are navigation tabs: Law, CAD, Stats, Master Search, Utilities, and Help. Below this is a header for 'Ticket - #210361663'. The main form contains fields for Ticket Type (CITATION), Ticket # (210361663), Case # (25-D-6584), Issue Date Time (05/12/2022 16:31), Issued By (ADMIN, ADMIN2), Badge # (123), Agency, Hwy Class (COUNTRY ROAD), State (TEXAS), Zone (ZONE 1), Business (JOES BBQ & FOOT MASSAGE), Accident (YES), Type (PROPERTY ACCIDE), and Race Known Prior To Stop (NO). Below the form are tabs for Issued To, Vehicle, Charges, Racial Profile, Modifiers, and Misc Notes. The 'Person Details' section shows a profile picture and fields for OLN (52145SDF214), OLN Expires, OLN State (WYOMING), Class (D), CCN (916065), Last (OLDMAN), First (GREG), Suffix (III), DOB (06/03/1932), Age (89), Race (W), Sex (M), Ethnicity, Height, Weight, Hair, Eyes, Complexion, Dir (S), St Name (OLDGREG), Type (ALY), City (GRAY CITY), State (WYOMING), Zip (75698), and Employer. At the bottom, a table shows search results:

Ticket #	Case #	Name	OLN	Plate #	Issued By
210361663	25-D-6584	OLDMAN GREG JENKINS	52145SDF214		ADMIN, ADMIN2
210361664	05-15-2022	OLDMAN GREG JENKINS	52145SDF214		DOOFY, OFFICER

- Incident reports assigned to a different organization than the approving organization were not being found in Case Management when searching by the assigned organization. The right results are now displayed in your search.

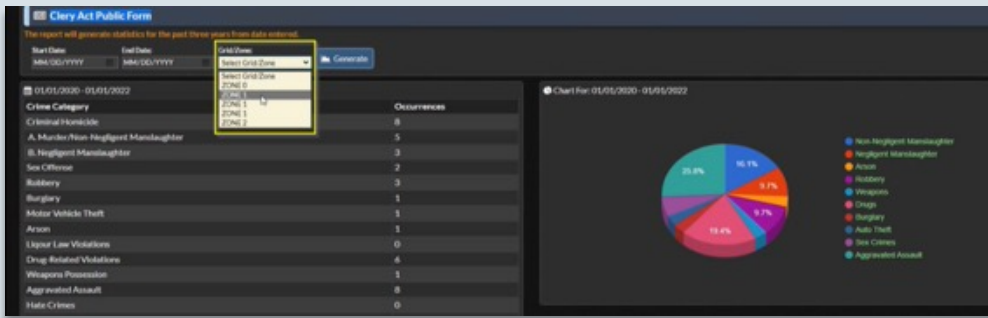

The screenshot shows the 'Approval Level' interface. It features a table with columns: User ID, Date/Time, Discussed, and Corrections. There are three rows, each with a 'Review' button and an 'Email Corrections To Officer' button. Below the table is a 'Forward To / Crime Category' dropdown menu with 'Organization' selected. At the bottom, there are sections for 'Approval' and 'Locked Details', each with a table and an 'Approve' or 'Lock' button.

- An addition to .jpg and .jpeg image file types, RMS also now accepts image/bmp file types.
- When using the Personnel module, demographic information was not saving properly. The demographic information is now saving correctly.

The screenshot shows the 'Personnel & Equipment' interface. It includes a 'Select Employee' dropdown with 'ADMIN | ADMIN, ADMIN' selected. Below this are fields for Status (ACTIVE), Race, Sex, DOB, Rank (ADMIN), SSN, Local ID, Educational Incentive, Address (500 N TEST AVE), City, State, Zip, and Phone. There are also icons for Arrests (0), Traffic Stops (0), Calls (0), and Reports created (1). At the bottom, there is a 'Contacts - 2' table:

Name	Relation	Address	City	State	Zip	Phone
TEST THREE	ESTRANGED	TEST ADDRESS	TEST CITY	LOUISIANA	510540540	546-546-5465
TEST CONTACT ONE	FAMILY	TEST ADDRESS	MANDEVILLE	LOUISIANA	70471	999-999-9999

- The Clery Act was not populating with accurate information from the reports. Accurate information is now printing on the reports. In addition we included a dropdown search to filter by zones/grids.

- A change to the incident number caused the master name, address, ID, and phone number from that particular incident to no longer be visible. The system will now continue to display the information even if the incident number is changed.
- Users received an error message when trying to submit Field Interview contacts. Field Interview contacts can now be added.
- When a report is rejected for officer corrections, the color did not change to make the user aware that it had been resubmitted. A resubmitted report will now show in gold.

- Currently, the incident report DOB age uses the incident date for the age calculation. However, it was using a different date to calculate max age validation. Now max age validation uses the same DOB calculation.
- When the system changes a case number, it was not changing the case number for the offenses that are linked to the property. Now the case number is linked to the property.
- When creating a Warrant from a name record in the system, certain fields will not save any updated data. Updated data is now being saved correctly.
- Users are unable to edit the property & evidence without receiving an error code. Editing property and evidence will now save correctly.
- There was an issue importing photos into RMS that was causing a performance degradation. The photo import process has been modified to improve performance.

- The Arrests count panel on the dashboard is currently displaying 0. The count now calculates the arrest date/time to give an accurate arrest number.
- The juvenile flag is now agency configurable. This allows any agency to change the juvenile age limit.
- When using the 'Person Search' to search for the offender, the officers receive an error code. Search has now been updated.
- When trying to recover a deleted report, the report was not visible because the field was case sensitive. The field is no longer case sensitive.
- In the Master Name Search when trying to assign an uploaded file as an ID, it was not saving the ID image for the person. Images are now able to be saved as an ID photo.
- The In-House criminal history command isn't functioning properly. Even though someone may have multiple arrests in our system, when we click in-house criminal history for them in the arrest register it always shows "0" arrests and no information pertaining to any arrest. Now the In-House rap sheet is updating correctly.
- Racial profile fields are not being populated from officer Interactions. Racial Profiling now has its own tab to capture data.

The screenshot shows a 'Racial Profile Details' form with the following fields and options:

- Stop Date/Time: 03/29/2022 11:15
- Officer Assignment: GENERAL PATROL
- Location of stop: CITY STREET
- Violation resulting in stop:
