Figure 2 - Ability to digitally sign forms

- Case Management
 - o Cases will now display Miranda Rights records that are associated with a case number.

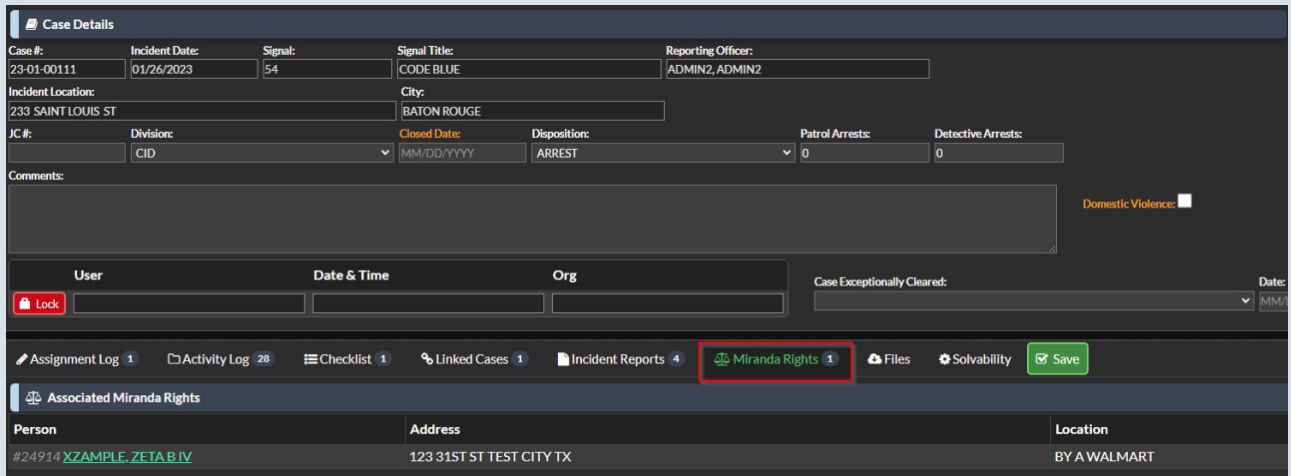

Figure 3 - Case Management

- Arrest Register
 - o Arrest Registers will now display Miranda Rights records that are associated with a case number.

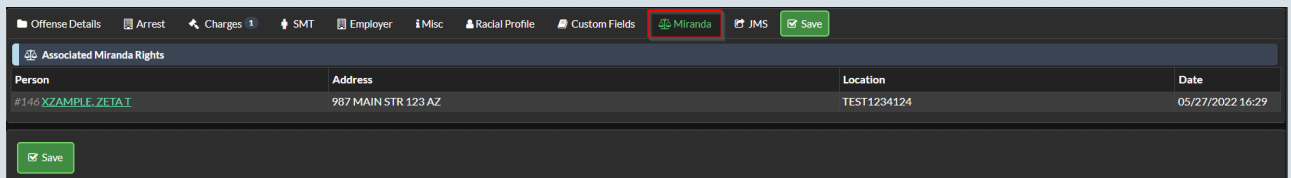

Figure 4 - Arrest Register

- Person Record
 - o Support for a unique ID for people with criminal arrests and bookings in the system has been built into RMS. This field by default is called CIDN (Criminal Identification Number).
 - o The CIDN field is optional, by default, but can be configured to be a required field.
 - o The name of the field can be changed by an agency to reflect something other than "CIDN".
 - o CIDN is generated in JMS and is a read-only field in RMS.
 - o CIDN has been added to Master Search as a search parameter and CIDN will display in the search results when name or CIDN searches are performed.

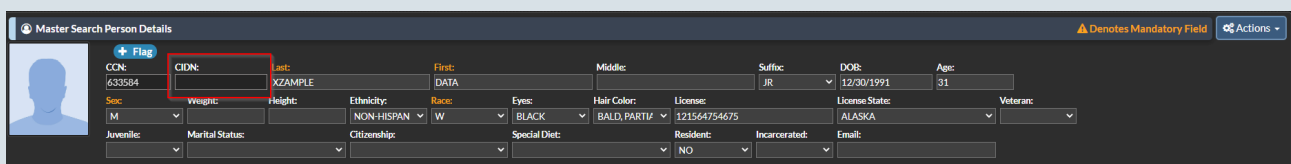

Figure 5 - CIDN added to Master Search

- o CIDN has been added to the Arrest Register module and is visible in the Arrest Register Search.

Figure 6 - CIDN added to the Arrest Register

IMPROVEMENTS

- Team Performance
 - o Summons will now be added to team performance arrest statistics for agencies that are also JMS clients.

Figure 7 - Summons added to team performance arrest statistics

- Miranda
 - o When creating a Miranda right, an error was resolved when using a person that doesn't exist in the system and trying to save.
- Dashboard
 - o On the RMS Dashboard, an issue was corrected where the Patrol Request would occasionally not display those that are expiring on the current date.
- User Management
 - o When looking at User Details and Permissions, the drop down fields for "Allow User to Update Behavior", "Allow User to Approve Calls for Service", and "Files SUPER User" have been set to "No" by default instead of being blank.
