

Kologik RMS

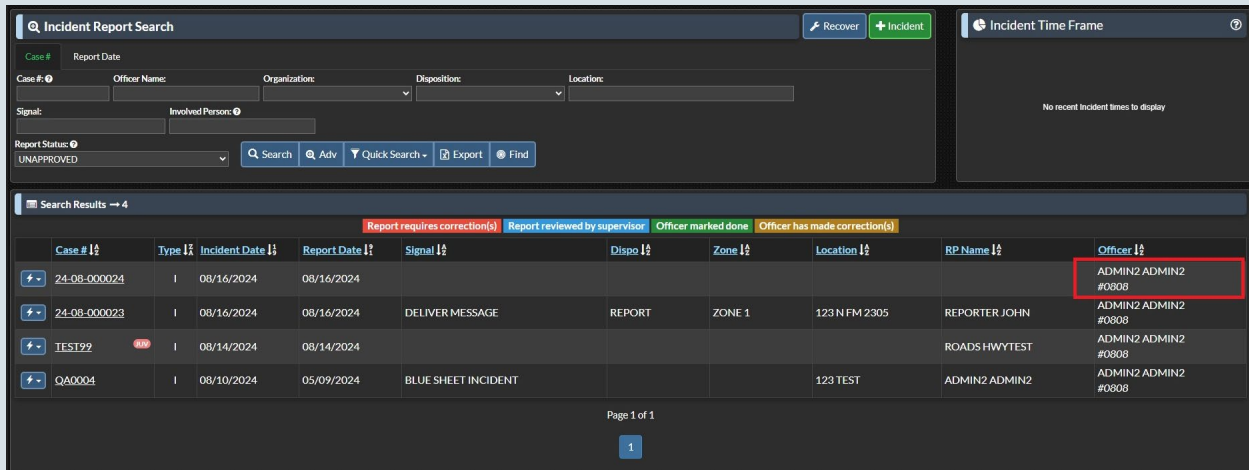

New Features and Improvements

RMS 1.0.98 Release Notes
Release Date: Monday, August 26, 2024

ENHANCEMENTS

- On the Search screen, the Officer's Radio # is now displayed under the Officer's Name.

The screenshot shows the 'Incident Report Search' interface. The search results table has the following columns: Case #, Type, Incident Date, Report Date, Signal, Dispo, Zone, Location, RP Name, and Officer. The first row of results shows 'ADMIN2 ADMIN2 #0808' in the Officer column, which is highlighted with a red box. The second row shows 'ADMIN2 ADMIN2 #0808' in the Officer column. The third row shows 'ADMIN2 ADMIN2 #0808' in the Officer column. The fourth row shows 'ADMIN2 ADMIN2 #0808' in the Officer column.

Case #	Type	Incident Date	Report Date	Signal	Dispo	Zone	Location	RP Name	Officer
24-08-000024	I	08/16/2024	08/16/2024						ADMIN2 ADMIN2 #0808
24-08-000023	I	08/16/2024	08/16/2024	DELIVER MESSAGE	REPORT	ZONE 1	123 N FM 2305	REPORTER JOHN	ADMIN2 ADMIN2 #0808
TEST99	I	08/14/2024	08/14/2024					ROADS HWYTEST	ADMIN2 ADMIN2 #0808
QA0004	I	08/10/2024	05/09/2024	BLUE SHEET INCIDENT			123 TEST	ADMIN2 ADMIN2	ADMIN2 ADMIN2 #0808

Figure 1 – Radio # by Officer's Name

- When viewing a case and all the associated Incident Reports, the report date is now displayed instead of just the incident date.

The screenshot shows the 'Case Details' form. At the top, there are fields for Case #, Incident Date, Signal, Reporting Officer, Incident Location, City, JC #, Division, Closed Date, Disposition, Patrol Arrests, and Detective Arrests. Below these is a 'Comments' section. A 'User' section with a 'Lock' button is also present. The 'Incident Reports' tab is selected, showing a table with columns: Type, Incident #, Incident Date, Report Date, Incident Location, Incident City, Deputy First Name, and Deputy Last Name. A red box highlights the 'Incident Date' and 'Report Date' columns. Below the table, there are fields for Victim Name, Race, Sex, DOB, Cell Phone, Home Phone, Suspect Name, Race, Sex, DOB, Cell Phone, and Home Phone.

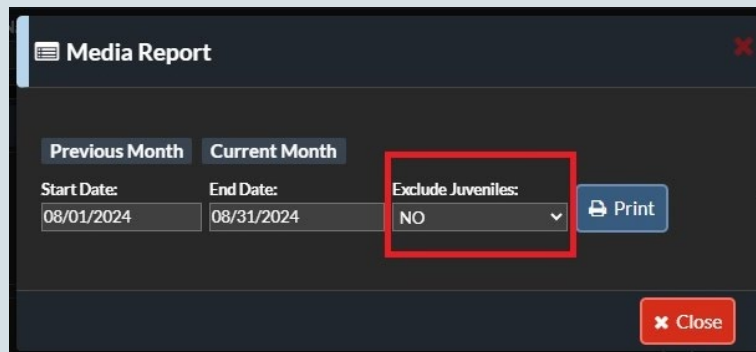

Figure 2 – Report Date and Incident Date

- The maximum character limit on the Case # field in Ticket Tracker was increased to 12 characters.

The screenshot shows the 'Ticket Tracker' form. At the top, there are buttons for 'ON' and 'OFF', and a 'Ticket - #210361728' label. Below this are fields for Ticket Type, Ticket #, Case #, Issue Date Time, and Issued By. A red box highlights the 'Case #' field, which contains the value '123456789012'. Below these are fields for Hwy Class, State, Zone, Business, Accident, and Type. At the bottom, there is a row of icons for 'Issued To', 'Vehicle', 'Charges - 1', 'Racial Profile', 'Modifiers', 'Misc Notes', and 'Files'.

Figure 3 – Case # field expanded

- An option was added to RMS to be able to redact Juvenile information from Media Reports.

The screenshot shows a 'Media Report' form with a dark background. At the top, there are two tabs: 'Previous Month' and 'Current Month'. Below the tabs, there are two date fields: 'Start Date' with the value '08/01/2024' and 'End Date' with the value '08/31/2024'. To the right of these date fields is a dropdown menu labeled 'Exclude Juveniles:' with the value 'NO' selected. This dropdown menu is highlighted with a red rectangular box. To the right of the dropdown menu is a blue 'Print' button. At the bottom right of the form is a red 'Close' button with a white 'x' icon.

IMPROVEMENTS

- The hover over text on Traffic Stops was updated to accurately reflect that it is showing Traffic Stops, not Citations.
- When performing an Advanced Search, the results are now filtering properly when a location is specified in the search criteria.
- On the General Information screen, Persons' names are now listed as Last, First, Middle, Suffix to match all other name listings in RMS.
- When exporting Calls for Service, the "How Call Received" column header is now displaying correctly in the Excel file.
- When importing warrants into an Arrest Register, multiple warrants associated with one suspect are now importing correctly.
- An issue was resolved where the Criminal Activity fields were hidden when the offense was changed from Criminal Activity being required to no longer being required. This caused issues with NIBRS validation as the Criminal Activity fields were still filled out but couldn't be updated when the offense was changed.
- An issue was fixed where the Call for Service number was used instead of the Case Number listed in the Call for Service module, when creating a linked incident report.
- When inputting data into the Weapons field, an error was resolved when more characters were inputted than allowed.
- Within Case Management, the value for "Exceptionally Cleared" is saved and displayed appropriately on the Case Report.
- Warrants that do not have a Date Served are no longer showing on all Warrant reports with a served date of 01/01/0001.
- When running a license plate in Ticket Tracker, the resulting car information is now parsing correctly into the ticket.
- When performing a Quick Search in Law – Interactions, the Type column is no longer blank when searching by any time length.
- When Arrest Registers are removed from a person, they are now appropriately removed from the Links tab and the Arrest Details tab, so they don't still appear on the arrest register media report and on the incident report.
- When a Miranda is created and tied to a Case #, the Miranda Rights is no longer listed twice when viewing the case.
- On the Patrol Request search page, when sorting the requests by begin or end dates, it's now sorting correctly, taking the year into account not just month/day.
- An issue was resolved where officers were not able to zip all the files connected to an Incident Report.

- An issue was resolved where the offense module was still intermittently referencing a victim/suspect that had been removed.
- When building a case, if there are multiple suspects, then all Probable Cause Affidavits are now printing with the Incident Report.
- When entering a person into an Incident Report, the address fields are now parsing correctly when the address has a type of FM, RM, UR, RR, or HWY.
