

Kologik (RMS) New Features and Improvements

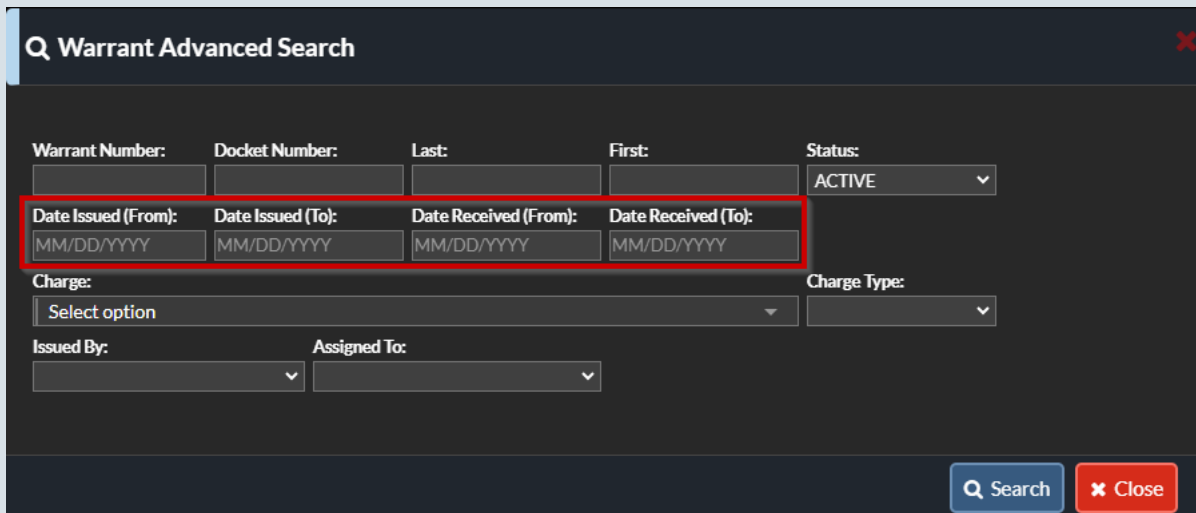

RMS 1.1.01 Release Notes

Release Date: Monday, December 30, 2024

NEW FEATURES

- Updates to the RMS NIBRS Submission process have been implemented to support NIBRS submissions in Florida.
- When performing a Warrant Advanced Search, users can search by date range for “Date Issued” and “Date Received”.

Warrant Advanced Search

Warrant Number:	Docket Number:	Last:	First:	Status:
<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	ACTIVE <input type="button" value="v"/>
Date Issued (From):	Date Issued (To):	Date Received (From):	Date Received (To):	
<input type="text" value="MM/DD/YYYY"/>	<input type="text" value="MM/DD/YYYY"/>	<input type="text" value="MM/DD/YYYY"/>	<input type="text" value="MM/DD/YYYY"/>	
Charge:	Charge Type:			
<input type="text" value="Select option"/>	<input type="button" value="v"/>			
Issued By:	Assigned To:			
<input type="button" value="v"/>	<input type="button" value="v"/>			

- User accounts will now follow a configurable password policy, which can be set at the agency level, including the following policies:
 - Enforcement of a minimum character limit (defaults to 8)
 - Enforcement of a minimum set of character types:

- Upper case (defaults to 1)
 - Lower case (defaults to 1)
 - Special Character (defaults to 1)
 - Number (defaults to 1)
 - Cannot be identical to previous passwords (defaults to 10)
 - Cannot contain your first name, last name or user ID
 - Cannot be a list of common words
 - The password must be changed at regular interval (default 90 days)
- On the Arrest Report, there is now the option to request a separate affidavit for each offense.
 - On the Warrants page, users are now able to define their preferred sort order for the returned results. Users can now sort, in either ascending or descending order, by:
 - Last Name
 - First Name
 - Date Issued (default)
 - Date Received
 - Warrant Status
 - Warrant Number
 - Docket Number

The screenshot shows a search interface for 'In House Warrant'. At the top, there is a search bar with the text 'Q In House Warrant'. Below the search bar, there are several filter options: 'Search Types:' with a dropdown menu set to 'NAME'; 'Last Name:' with an empty text input field; 'First Name:' with a text input field and a help icon; 'Status:' with a dropdown menu set to 'ACTIVE'; 'Order By:' with a dropdown menu set to 'DOCKET NUMBER'; and 'Order Direction:' with a dropdown menu set to 'DECENDING'. A dropdown menu is open under 'Order By:', showing a list of options: 'LAST NAME' (highlighted in blue), 'FIRST NAME', 'DATE ISSUED', 'DATE RECEIVED', 'WARRANT STATUS', 'WARRANT NUMBER', and 'DOCKET NUMBER'. Below the filters, there is a section for 'Search Results' with a right-pointing arrow and the number '8'. The main content area below is mostly blank, suggesting the search results are not fully visible.

IMPROVEMENTS

- When searching for a warrant using the Person option, the warrant number is now displayed instead of the warrant id.
- When printing a Use of Force report, the Hospital name is now capitalized to match the rest of the data on the report.
- After running a license plate, all the appropriate information is now parsed and will populate the Incident Report and Ticket Tracker correctly.
- When printing an Arrest Register, the person's nickname is no longer duplicated.
- When transferring a Call for Service from CAD to RMS, the Employee field is now correctly populated with the officer's name.
- An intermittent issue was resolved when officers received an error message while looking into a suspect's arrest register details.
- Users are no longer able to input forbidden characters, like a period (.), into the Call for Service Number field.
- When an incident report is unapproved for corrections, the misspelling in the log entry was fixed.
- After performing a Property and Evidence search, the export of that search now only includes the information that matches the search results, instead of including extra information.
- A fix was implemented to ensure the proper notifications are being sent to the intended users when an Incident report is marked final.
- When deleting duplicate arrest registers for an offender, the duplicate is no longer showing in the offender's person profile.
- After searching for Incident Reports by data range in Advanced Search, the exported result now correctly respects the search criteria.
- When resubmitting NIBRS monthly submissions, incident reports that need to be resubmitted are now being generated correctly in the flat file to replace the deleted reports.
- [Texas only] Several NIBRS errors, when submitting to the state, were addressed.
- [Tennessee only] An issue was resolved where NIBRS errors were generated when an Incident Report only contained Group B offenses.

- When the GIS mapping report is not enabled on an agency RMS, it will no longer appear in the Utilities dropdown.
